

About Company

[Ericks & Fredericks International Consulting](#)

Sensational opportunity is open for a suitably qualified ICT Business Analyst to join a leading Educational and Management consultancy firm

Efint Consulting is a global company specialising in supporting our clients to maximise their performance and achieve their vision – working with large companies, small businesses and individuals across more than 40 industries and with a global reach, bringing a one stop solution to your consultancy related queries.

Duties and Responsibilities includes

- working with users to formulate and document business requirements
- identifying, investigating, and analysing business processes, procedures and work practices
- identifying and evaluating inefficiencies and recommending optimal business practices, and system functionality and behaviour
- using project management methodologies, principles and techniques to develop project plans and to cost, resource and manage projects
- taking responsibility for deploying functional solutions, such as creating, adopting and implementing system test plans, which ensure acceptable quality and integrity of the system
- creating user and training documentation, and conducting formal training classes
- developing functional specifications for use by system developers
- using data and process modelling techniques to create clear system specifications for the design and development of system software
- Acting as a central reference and information source, providing guidance and assistance in the system project decision making process.

Your new role

As the successful applicant, you will work with the business to understand, document and implement the business activities delivered through the FinanceOne module of TechOne. You will have skills and experience working closely with internal stakeholders in order to deliver positive service outcomes. The role also requires ICT TechOne CES subject matter expertise, focused on the application of financial knowledge. You will manage, facilitate and gather requirements for change management to enterprise systems. The successful applicant will deliver high value analysis with respect to supporting the financial businesses to meet the strategic objectives and vision of the organisation; while maximising the Knowledge Management Departmental capabilities and capacity, ensuring effective service delivery to the diverse business units

Basic Requirements:

- 1. Bachelor degree or higher education qualification in Business Information Technology
- 2. At least 12 Months of relevant work experience
- 3. Relevant vendor certification preferred
- 3. Fluent English both oral and written

To be Successful for this role:

You will have demonstrated knowledge and experience in the Information Technology industry consistent with the role. You will have experience and expertise focussed on Finance systems, ideally utilising TechOne. Advanced Excel/ExcelOne skills will also be extremely valuable in this role. You will possess experience working with a range of stakeholders to determine, manage and implement improvements. Exceptional skills in communication, negotiation and consultation to engage with stakeholders and work within the framework of Customer Relationship Management and Vendor Management are a must to take on this role. An ideal candidate will possess highly developed analytical and problem-solving skills.

To Apply

Please include your most up to date Resume and a cover letter outlining your suitability for the role. To Recruitment@efintconsulting.com. Applications close on 16 July 2016.
